Address: Via Baccano 59, A, 00188, Roma, Italy (Home)

● ABOUT ME

Who I am

I have always been multifaceted and curious, perceptive and eager to take on new challenges. Over time, my profile has evolved into a well-rounded personality.
My academic and professional background in the humanities has given me the ability to connect the IT world with the needs of the client.
I aim to transform the abstract into something tangible, organized, and functional when I write code, but more importantly, even before I start coding.

● WORK EXPERIENCE

01/03/2024 – CURRENT Roma, Italy
DEVELOPER BENTRAINING

I joined the team as a front-end developer and spent the first few months working on the development of *To Rental* in **Angular** (first version **16**, later **17**), a project focused on fleet management.

As the team grew, we decided to adopt the **Agile** methodology for organization and a full-stack approach for the technical side. I began contributing to both back-end design and development, while still keeping my main focus on Angular.

For data management, we use **SQL** with **SSMS**, and the back-end is built with **C#** on **.NET 8**, following the **CQRS** pattern in a **microservices** architecture.
I'm also working on ongoing projects related to business digitalization, where we're designing smart solutions to meet our company's needs.

In addition to technical skills, I focus on **relational abilities**, which are key to effective **communication**. This helps set clear goals and work more efficiently.

● EDUCATION AND TRAINING

22/05/2023 – 22/11/2023 Italy
FULL-STACK DEVELOPMENT - ADVANCED TRAINING COURSE Epicode

The bootcamp had a well-defined structure, which kept me fully engaged with mandatory attendance for six months.

From Monday to Thursday, the study day started at 9:00 with live lectures until 13:00. In the afternoon, from 14:00 to 18:00, we worked on exercises, sometimes individually and sometimes in groups. We then corrected and discussed them with the instructor at the end of the day.

Friday was dedicated to consolidating the topics covered during the week. In the morning, we had a theoretical test, followed by a project exercise in the afternoon. Both tests were graded, and if the results were insufficient, there was an opportunity for recovery.

To obtain the certificate, I had to complete a capstone project within a month, defining its design and technologies with the instructor.

HTML5, CSS3, BOOTSTRAP, SASS, JS, TS, ANGULAR, .NET, C#, SQL, jQuery, ASP.NET, ADO.NET, API REST, WEB FORM, MCV, Entity Framework, GITHUB.

Field of study High-tech

Link <https://lnkd.in/dzDf3f-5>

09/2020 – 22/09/2022 Italy
MASTER'S DEGREE IN LINGUISTIC, LITERARY, AND TRANSLATION STUDIES Sapienza Università di Roma

Address Viale dello Scalo S. Lorenzo, 82-88, 00159, Italy | Final grade 110/110 e lode

2016 – 04/2020 Italy
BACHELOR'S DEGREE IN LANGUAGES, CULTURES, LITERATURES, AND TRANSLATION Sapienza Università di Roma

Address Viale dello Scalo S. Lorenzo, 82-88, 00159, Italy

● **LANGUAGE SKILLS**
